# **GUJARAT TECHNOLOGICAL UNIVERSITY**

## COMPUTER ENGINEERING/INFORMATION TECHNOLOGY SUBJECT NAME: IOT AND APPLICATIONS SUBJECT CODE: 2180709 B.E. 8th SEMESTER

**Type of course:** Bachelor of Engineering

**Prerequisite:** Fundamentals of computer network, wireless sensor network, communication & internet technology, web technology, information security.

**Teaching and Examination Scheme:** 

| Teaching Scheme Credits |   |   | Examination Marks |              |    |                 |     | Total |     |     |
|-------------------------|---|---|-------------------|--------------|----|-----------------|-----|-------|-----|-----|
|                         |   |   |                   | Theory Marks |    | Practical Marks |     | Marks |     |     |
| L                       | T | P | C                 | ESE          | PA | A (M)           | ES  | E (V) | PA  |     |
|                         |   |   |                   | (E)          | PA | ALA             | ESE | OEP   | (I) |     |
| 3                       | 0 | 2 | 5                 | 70           | 20 | 10              | 20  | 10    | 20  | 150 |

### **Content**

| Sr.<br>No. | Syllabus Content   | No. of<br>Hours |
|------------|--|-----------------|
| 1          | IoT & Web Technology The Internet of Things Today, Time for Convergence, Towards the IoT Universe, Internet of Things Vision, IoT Strategic Research and Innovation Directions, IoT Applications, Future Internet Technologies, Infrastructure, Networks and Communication, Processes, Data Management, Security, Privacy & Trust, Device Level Energy Issues, IoT Related Standardization, Recommendations on Research Topics.    | 8               |
| 2          | <ul> <li>M2M to IoT – A Basic Perspective– Introduction, Some Definitions, M2M Value Chains, IoT Value Chains, An emerging industrial structure for IoT, The international driven global value chain and global information monopolies.</li> <li>M2M to IoT-An Architectural Overview– Building an architecture, Main design principles and needed capabilities, An IoT architecture outline, standards considerations.</li> </ul> | 10              |
| 3          | IoT Architecture -State of the Art – Introduction, State of the art, Architecture Reference Model- Introduction, Reference Model and architecture, IoT reference Model, IoT Reference Architecture- Introduction, Functional View, Information View, Deployment and Operational View, Other Relevant architectural views.  | 10              |
| 4          | IoT Applications for Value Creations Introduction, IoT applications for industry: Future Factory Concepts, Brownfield IoT, Smart Objects, Smart Applications, Four Aspects in your Business to Master IoT, Value Creation from Big Data and Serialization, IoT for Retailing Industry, IoT For Oil and Gas Industry, Opinions on IoT Application and Value for Industry, Home Management, eHealth.                                 | 8               |

| 5 | Internet of Things Privacy, Security and Governance                                     |  |  |  |
|---|---|--|--|--|
|   | Introduction, Overview of Governance, Privacy and Security Issues, Contribution from    |  |  |  |
|   | FP7 Projects, Security, Privacy and Trust in IoT-Data-Platforms for Smart Cities, First |  |  |  |
|   | Steps Towards a Secure Platform, Smartie Approach. Data Aggregation for the IoT in      |  |  |  |
|   | Smart Cities, Security  |  |  |  |

### **Suggested Specification table with Marks (Theory):**

| Distribution of Theory Marks |         |         |         |         |         |
|------------------------------|---------|---------|---------|---------|---------|
| R Level                      | U Level | A Level | N Level | E Level | C Level |
|                              |         |         |         |         |         |
|                              |         |         |         |         |         |

Legends: R: Remembrance; U: Understanding; A: Application, N: Analyze and E: Evaluate C: Create and above Levels (Revised Bloom's Taxonomy)

Note: This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

**List of Experiments:** 

Design based Problems (DP)/Open Ended Problem:

**ACTIVE LEARNING ASSIGNMENTS**: Preparation of power-point slides, which include videos, animations, pictures, graphics for better understanding theory and practical work – The faculty will allocate chapters/ parts of chapters to groups of students so that the entire syllabus to be covered. The power-point slides should be put up on the web-site of the College/ Institute, along with the names of the students of the group, the name of the faculty, Department and College on the first slide. The best three works should submit to GTU.
